

Flocks of Socks recipients are children from our partnering hospitals like Arnold Palmer Children's hospital who are receiving chemotherapy for their cancer treatments. While medicines are being administered the children's feet tend to get cold. A pair of warm socks can go a long way for a child living with pediatric cancer. To make sure the socks are safe they are required to have traction like a pair of socks with skids. All donations are accepted, but if you, your school, youth groups, or church would like to create your very own pair of custom socks, here is how!!!

- 1. Funraise Socks**
- 2. Place Socks Toe Side Up**
- 3. Grab Your Fabric Paint And Get Creative**
- 4. Allow About 5 Hours To Dry**
